

The Treason Bowl February 2, 2014 at the Meadowlands Sports Complex

Hello,

For reasons soon to be obvious to you, I will not introduce myself, nor any of the others who have contributed to this notification. We have been involved with the construction and operation of the new MetLife Stadium at the Meadowlands Sports Complex. Some of our involvement precedes the groundbreaking, and some of our involvement is current.

From here on, I will refer to the upcoming Super Bowl as the "Treason Bowl". From the start, from design stages, plans have been made for the stadium, and the American Dream Meadowlands complex, to host a well-planned false flag event, so grand that one would think it was planned in the offices of Josef Goebbles himself. This has been in the works for at least six years.

The highlight of this treason will be the world-wide live television coverage of this abomination of civilization. This promotion of fear and horror is hoped to inspire the masses of the world to willfully submit to the eradication of rights given to us by God.

In the very design of the stadium, spots were planned for the placement of bombs, not to immediately kill the stadium guests, but to entrap the guests. The bomb placements are for the creation of choke points to control the movement of the guests.

Remember, the highlight is the international live broadcast of desperate human suffering. It will first be answered by military-ized police and thug-like New Jersey state police, but to ONLY be resolved by US Army troops from Ft. Dix.

The fix is in; racketeering at its finest hour.

You may notice that the New Jersey State Police Sports Complex Unit has a noticeable high percentage of troopers that are very big, look like thugs, and we assure you - act like thugs. Seven of us have witnessed experiences with them, with varying degrees of rudeness, misery and disgust. There are traitors within this local state police force who will be enabling the apparent foreigners, in the stadium and in the whole complex. It has been harder for us to be exact with numbers of US federal agents in on the false flag fix, but we have confirmed they to be from DHS, NSA, FBI and Blackwater.

For the Treason Bowl, there may be as many as 11 armed "foreign terrorists" in the stadium itself, being another 8 of them in the rest of the complex, including Meadowlands Station.

A heavier-than-air poison gas will be brought in with the CO2 canisters that are used by soft drink vendors. It will not be a quick killer as chlorine gas, but rather a gas that causes more physical contortions and suffering, for high-impact live video. This heavier-than-air poison will first target the field level, most notably the athletes on the field. Specific placement of bombs will insure that no one leaves the field level, ala the closed choke points.
